

Goals (highlighted have been completed + placed in backlog)

- Add QR generator for manager
- Add QR scanner for users
- Change manager portal to two different manager portals (just approve clock/in out; 'superpower')
- Volunteer resubmit a denied application
- Volunteer view approved/pending/denied application
- Check for complete input in submitting application
- Approve check in/out feature needs heavy tweaking
- Manager ability to create clock in/out entries
- Search for clock in/out by name, date, ethnicity, sex, etc.
- Export clock in/out as excel/csv
- Ability to aggregate hours
- Search for applications by name
- Upload and approve profile photos (incorporate into application page...)
- Build and Submit to app store.
- 5 more test cases
- Website
- Manager must clock out for someone
- Fix approve applications page (no longer is functional on my phone - marie)
