2020/10/15

BENJAMIN JONES
- What's been done: Sprint 1 presentation
- What'll be done: Sprint 2 planning, firebase roles, password restrictions
- What's been hard:

BRANDON LUCAS
- What's been done:
  - Sprint 1 Presentation
- What'll be done:
  - Roles with Firebase, begin implementing manager screens
- What's been hard:
  - N/A

MYLES MCLEROY
- What's been done:
  - Sprint 1 presentation
- What'll be done:
  - Sprint 2 planning
  - Password requirements for creating an account
- What's been hard:

MARIE NEUBRANDER
- What's been done:
  - Sprint 1 presentation.
- What'll be done:
  - Sprint 2 planning!
  - Switch functionality of check-in/check-out to match new firestore system
- What's been hard:
  - N/A

2020/10/20

BENJAMIN JONES
- What's been done:Sprint 2 planning
- What'll be done:Roles, manager screens, password requirements
- What's been hard:

BRANDON LUCAS
- What's been done: Sprint 2 planning
- What'll be done: Meeting times for Dr. Thompson-Jackson
- What's been hard: N/A

MYLES MCLEROY
- ● What's been done:
  - ○ Sprint 2 planning
- ● What'll be done:
  - ○ Get times for meeting with Dr. Thompson-Jackson
- ● What's been hard:

MARIE NEUBRANDER (missed meeting)
- ● What's been done:
- ● What'll be done:
- ● What's been hard:

2020/10/22

BENJAMIN JONES
- ● What's been done:None
- ● What'll be done:Roles, manager screens, password requirements
- ● What's been hard: Programming Languages exam 3, doing 35 hours at work

BRANDON LUCAS
- ● What's been done: None
- ● What'll be done: Manager screens
- ● What's been hard: Programming languages and interview prep

MYLES MCLEROY
- ● What's been done:
  - ○ Meeting times for Dr. Thompson-Jackson
  - ○ Which daily standup to cut (moving from 3x to 2x)
- ● What'll be done:
- ● What's been hard:
  - ○ Programming languages and AI have eaten up an enormous amount of time

MARIE NEUBRANDER
- ● What's been done:
  - ○ Nothing technical since last meeting.
- ● What'll be done:
  - ○ Meet with Dr. Thompson-Jackson!
  - ○ Begin switching to firestore (will be done this evening.
- ● What's been hard: Programming languages exam 3 was a large time sink for the past two days.

2020/10/27

BENJAMIN JONES
- What's been done:
- What'll be done:
- What's been hard: some technicalities of Roles

BRANDON LUCAS
- What's been done: Created manager screen and added approve/deny logic
- What'll be done: Fix minor bugs for manager screen, begin work on QR codes
- What's been hard:

MYLES MCLEROY
- What's been done:
  - Reactive password strength checker
  - Code refactoring on login/sign in/ sign up
- What'll be done:
  - TES site visit
- What's been hard:

MARIE NEUBRANDER
- What's been done:
  - Converted clock in/clock out screen and reload screen to use firestore backend instead of real time database backend
  - Attempted to convert 'resume' function to a redux-based system; this was not completed successfully
- What'll be done:
  - Convert 'resume' function to use-effect functionality
  - Add ability to add profile information
- What's been hard:
  - Getting redux to work
  - Converting realtime database to firestore

2020/10/30

BENJAMIN JONES
- What's been done: TES visit
- What'll be done:
- What's been hard: some technicalities of Roles

BRANDON LUCAS
- What's been done:
  - Visited TES, made clarifications with Dr. Thompson Jackson
  - Fixing bugs for manager screen

- What'll be done: begin implementing QR codes
- What's been hard: There have been a few bugs relating to the manager screen approve/deny feature that are a bit tricky to fix

MYLES MCLEROY
- What's been done:
    - TES site visit
- What'll be done:
    - Fix reactive password checker (broke our app due to a dependency issue)
    - Info on printing labels (feasibility, models, prices, vendors, comparison shopping)
- What's been hard:

MARIE NEUBRANDER
- What's been done:
    - TES Site Visit
    - Tried to convert resume logic to 'useffect' logic but it never wanted to resume. I think it should be an easy fix.
- What'll be done:
    - Convert resume logic to 'useffect'.
    - Add profile information component to app.
- What's been hard:
    - Some incompatibilities that seem to exist between previewing on web vs app (with password checker)
    - Some of the useffect errors have been hard to interpret (but that is nothing new).

2020/11/03

BENJAMIN JONES
- What's been done: some printer research, Reduced my hours at work so I have time, scheduled work session
- What'll be done: roles
- What's been hard:

BRANDON LUCAS
- What's been done: researched react native printer packages
- What'll be done: determine printer feasibility, git reverting broken changes
- What's been hard: Determining whether it's feasible to utilize printer with React Native, and how specifically to do that with Expo (if possible)

MYLES MCLEROY
- What's been done:
    - Went to Best Buy to look at printers, research React Native printing package
- What'll be done:

- ○ Finalize printing feasibility
- ● What's been hard:
  - ○ Best Buy didn't have as many options for printing as I thought they would

MARIE NEUBRANDER
- ● What's been done:
  - - Pseudocode for useffect resume, outlined process/pseudocode for profile info
  - - Tried to look at error that comes on pull but to no success
- ● What'll be done:
  - ○ Implement above pseducode once we git revert
- ● What's been hard:
  - ○ Printer research
  - ○ Getting code to run

2020/11/06

BENJAMIN JONES
- ● What's been done: Roles, manager approve, radio buttons, back button
- ● What'll be done: improve manager approve, QR codes
- ● What's been hard: navigation to special pages, formatting

BRANDON LUCAS
- ● What's been done: Add initial test cases (snapshot tests) and component tests for one screen
- ● What'll be done: Add tests for all screens
- ● What's been hard: Can't seem to get state from tests

MYLES MCLEROY
- ● What's been done:
  - ○ Determined printing is not feasible
- ● What'll be done:
  - ○ Quality of life changes to sign in/sign up screens
- ● What's been hard:

MARIE NEUBRANDER
- ● What's been done:
  - ○ Automatically resuming volunteer session
- ● What'll be done:
  - ○ adding different components to profile page for volunteers (apply to be a volunteer, placeholders for viewing application and re-applying if denied),
  - ○ updates on manager approve
- ● What's been hard:

  ○ Finding source of large number of reads

2020/11/09

BENJAMIN JONES
- What's been done: Some base QR scanning, improving manager approve
- What'll be done: sprint 2 presentation/retrospective/backlog/etc
- What's been hard: Getting QR code state to save and display properly

BRANDON LUCAS
- What's been done: Finish adding tests to every screen so far,
- What'll be done: Make screens change based on roles, added roles to redux
- What's been hard: change based on roles logic was complex

MYLES MCLEROY
- What's been done:
  - Force emails to lowercase, change keyboard appearance
  - Fixed various user input bugs (like text disappearing)
  - Sprint 2 slides, backlog, retrospective
- What'll be done:
  - Sprint 2 presentation
- What's been hard:

MARIE NEUBRANDER
- What's been done:
  - Improving application to be a volunteer
  - adding different components to profile page for volunteers (apply to be a volunteer, placeholders for viewing application and re-applying if denied),
  - updates on manager approve
- What'll be done:
  - Clean up database records
  - Update clock in/out to check for volunteers with verified applications
  - Modify functionality of manager approve clock in/out screen
- What's been hard:
  - Trying to get navigation to function differently depending on role; brandon was able to fix this!
  - Determining functionalities for approvals that are useful but have easy functionality for users without strong tech abilities
