Goals (highlighted have been completed + placed in backlog)
- *Add QR generator for manager*
- *Add QR scanner for users*
- *Change manager portal to two different manager portals (just approve clock/in out; 'superpower')*
- *Volunteer resubmit a denied application*
- *Volunteer view approved/pending/denied application*
- *Check for complete input in submitting application*
- *Approve check in/out feature needs heavy tweaking*
- *Manager ability to create clock in/out entries*
- Search for clock in/out by name, date, ethnicity, sex, etc.
- Export clock in/out as excel/csv
- *Ability to aggregate hours*
- *Search for applications by name*
- Upload and approve profile photos (incorporate into application page…)
- Build and Submit to app store.
- 5 more test cases
- Website
- Manager must clock out for someone
- Fix approve applications page (no longer is functional on my phone - marie)

Backlog
- Check for complete input in submitting application
- Volunteer view approved/pending/denied application
- Change manager portal to two different manager portals (just approve clock/in out; 'superpower')
- Volunteer resubmit a denied application
- Approve check in/out feature need heavy tweaking
